DETAILED ACTION

Allowable Subject Matter

1. Claims 76-126 are allowed.
2. The following is an examiner's statement of reasons for allowance: Galbi discloses an MPEG audio/video decoder. The prior art does not specifically disclose the combination of limitations, "an input means for inputting an asynchronous data stream; a video output means for outputting the decoded video data to the external display device; an audio output means for outputting the decoded audio data to the external audio output device; and a processor for executing task programs from a first task program to a fourth task program stored in an instruction memory, by switching between the four task programs, the task programs including: the first task program for transferring the data stream from the input means to the memory; the second task program for supplying the data stream from the memory to the decode processing means; the third task program for outputting the decoded video data from the memory to the video output means; and the fourth task program for outputting the decoded audio data from the memory to the audio output means", as disclosed in claim 76. Similarly, claims 85 and 97 are patentable for similar reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
